About FNS

Feliciana Nature Society objectives are to enhance the community's awareness, education and understanding of the many unique natural resources in Felicianas. We are involved in special projects and initiatives which encourage and support research of the area's natural and historic resources, and to stimulate community interest and understanding of the area's nature habitats and land conservation.

Feliciana Nature Society objectives are to enhance the community's awareness, education and understanding of the many unique natural resources in Felicianas. We are involved in special projects and initiatives which encourage and support research of the area's natural and historic resources, and to stimulate community interest and understanding of the area's nature habitats and land conservation.

Memberships in the Feliciana Nature Society programs help to ensure that the natural legacy of the Felicianas will remain for future generations.

Our projects are undertaken with funding from membership fees and fund-raisers. However, donations are welcome as outside funding is often needed.
